

TTL Modulated 635nm-980nm Miniature Laser Diode Modules, Dia. 10.5mm x L. 20.5mm, Elliptical Beam

PLG-T Series

Overview

The Lasermate PLG-T series laser diode module system with TTL modulation is a self-contained laser diode system designed for OEM applications with adjustable focusing and APC circuit design features. Additional heat sink may be needed for the laser module under continuously operating for a long period of time. Designed for OEM, the laser is ideal for a wide range of low power laser applications, such as general sighting, leveling and positioning.

Features

- Wide range of wavelengths from 635nm to 980nm (including 650nm, 670nm, 780nm, 808nm, 850nm, 904nm)
- Different output power levels for different wavelengths
- Adjustable focus
- Elliptical beam profile
- Singlet glass collimating lens
- Automatic Power Control (APC) circuits
- TTL modulation to 100kHz

Applications

- General sighting
- Leveling
- Positioning
